

Eastern Africa feedback refer

CLIC project

Combining Local Innovative Capacity with Scientific Research – Strengthening Resilience to Climate Change

**(Ethiopia, Kenya, Tanzania, Uganda), funded
by Rockefeller, 1 Mar 2012–28 Feb 2015**

Common understanding of the proposal

- The role of gender- ‘especially” women was agreed upon.
 - The project puts emphasis on the role of women in entire project implementation
- Launching workshop
 - At national level – policy awareness, complementary with government policy and cc programmes
 - At District level for planning purposes with stakeholders
- Field study and baseline survey
 - Can be done together, however it's the first activity in the proposal
 - Baseline will get a format from IIRR, purpose for M & E.
 - Field study,- Teresiah & Emanuel will share previous tools used in other studies
- Implementation of 3 selected innovation for joint experimentation PID.
 - Can use experts if researcher not interested
 - They are not under LISF component
 - Document the process as well as the results

Cont.

- Training on meteorology
 - Need to include IK of predicting weather in the survey
 - Also after the training, the practical use need to be inculcated in the PID process
- Training of CSO
 - 100 staff needs to be trained
 - This can be from the entire project even though they do not all implement the project
- LISF process continues in the same selected districts
 - Take up a new district where LISF is not operational?
 - The two districts can be completely new and initiate LISF

Other issues

- CLIC Acronym agreed upon
- Need to have a three year overall budget and a one year detailed plan of action
- Communication through a yahoo group established among the 4 countries
- Complementary funding especially from EED- Emanuel to initiate the process, but all of us to look for other avenues
- Training
 - Needed based on need and during interaction with the person/expert in charge of the field survey
 - NUFFIC Proposal – explore it individually
- Gender issues
 - To be dealt with from the beginning I the base line survey
 - Cautious mind in the implementation, division of roles and selection of the innovations
 - Percentages of participation

- IPW sharing
 - In East Africa next year inclusive of field visit
 - Next IPW in Asia for the share purpose
- M & E Backstopper – IIRR Marise Espineli
- General backstopping – ETC Laurens,
